Markham, ON | ☎ 647-904-8449 | ✉ amsal.ali77@gmail.com | in [linkedin.com/in/amsalali/](https://www.linkedin.com/in/amsalali/) | 🐙 github.com/ali-amsal/

SUMMARY OF QUALIFICATIONS

- Computer Science graduate with over a year of professional experience gained through co-op roles in software development, automation, and cloud computing. Proven ability to design and deploy scalable applications using Python, Java, React, and SQL with practical experience in Azure and AWS. Strong foundation in full-stack development, data automation, and AI-driven solutions, with a track record of improving efficiency and delivering real-world impact.

EDUCATION

York University

Toronto, ON

Bachelor of Science in Computer Science

Sep. 2020 – August 2025

- **Key Courses:** Advanced Algorithms, AI & Logic Programming, Compilers and Interpreters, Cyber-Security, Data Structures, Database Management Systems, Operating Systems, Software Design

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C/C++, HTML, JavaScript, SQL, Prolog, VBA Scripting, Verilog.
- **Frameworks and Tools:** AI Integration, Angular, Azure, AWS, Flask, Hadoop Hive, JUnit testing, MySQL, Node.js, Power BI, React, Spark SQL.
- **Applications:** Atlassian, BMC Remedy, Confluence, ITSM Applications, Jira, Microsoft Dynamics 365, Microsoft SCCM, Salesforce, ServiceNow, SharePoint.

EXPERIENCE

Royal Bank of Canada (RBC)

May 2025 – August 2025

Automation Analyst - Full Stack Developer

Toronto, ON

- Developed dynamic Angular forms with robust validation for both free text and file-based test case generation, **reducing manual testing errors by 25%**.
- Integrated **frontend and backend** layers with **RESTful APIs** and **OpenAI RAG pipelines**, enabling **context-aware GenAI test case generation** while automating repetitive workflows.
- Utilized **Microsoft Azure cloud services** to deploy and manage **AI-driven application components**, enabling **secure storage, efficient API hosting, and scalable processing for GenAI-powered features**.
- Executed **50+ QTest cases** during authentication migration, achieving **100% accuracy**

Hydro One

Aug 2022 – Sept 2023

IT Systems Analyst

Toronto, ON

- Developed, monitored, and validated **VBA automation scripts** in MS Excel to streamline Quarterly Access Audits, **improving processing time by 30%**.
- Optimized and created **data pipelines** to extract raw data from a ticketing system, generating Weekly and Monthly KPI Reports in Excel, improving reporting **efficiency by 25%**.
- Conducted Quarterly Access Audits to ensure compliance with **security and governance policies**, enhancing data integrity, strengthening access controls, and improving workflow accuracy.
- Ensured accurate issue tracking for **200+ critical cases** by managing ticket creation and documenting significant IT events in BMC Remedy 9.1

PROJECTS

Stock Trading Agent using SARSA Reinforcement Learning | *Python, OpenAI Gym, NumPy, Matplotlib*

- Engineered a modular stock trading agent in Python using the **SARSA algorithm and OpenAI Gym**, integrating technical indicators (MACD, EMA, RSI) and an ϵ -greedy policy to optimize hourly buy/sell/hold decisions.
- Achieved **+6.3% profit on META** and **+4.7% on TSM** in a 6-month test period; enabled reusable CLI tools for training/testing and visualized agent decisions through annotated trading signal plots.

Network Analysis: Optimizing Hiring with GitHub Data | *Python, Network Analysis, GitHub API*

- Built a **network analysis model** using GitHub and Kaggle data, deploying on **Azure cloud** services and applying **PageRank and Louvain community detection** to evaluate candidates' technical and collaboration skills.
- Achieved high precision and recall in predicting successful hires, streamlining recruitment and improving team outcomes.
